

**Section: Inside the Earth**

If you journeyed to the center of the Earth, what do you think you would see along the way?

Draw an illustration of the journey in your **science journal**.

**Section: Restless Continents**

Judge what is meant by the following statement:

“The United States is moving westward.” From what you know about geology and plate tectonics explain if you believe this statement to be true or false.

Record your answer in your **science journal**.
